

New Electric Vehicle Charging Stations

We are excited to announce the availability of our new electric vehicle charging stations from SemaConnect at our property!

These EV charging stations can charge all electric and plug-in hybrid vehicles and are safe, reliable, and easy to use.

If you're thinking about purchasing an electric vehicle, own one, or know someone who has one, be sure to spread the word about our new smart EV charging stations!

Thanks and happy charging!

How to Charge your EV

1. Tap your SemaConnect pass on the charging station's card reader symbol, or select the station using the SemaConnect mobile app
2. Unplug the connector from the charging station and insert into your EV. Once you hear the "Click," you'll know it's secure.
3. The station will turn from constant blue lights (available) to a breathing green light. This indicates that your car is charging.
4. A constant green light means that your EV is fully charged. You can end your charging session by simply unplugging the connector from your vehicle. As a courtesy to other drivers, don't forget to coil the cord around the bracket and plug the connector back into the station.

5 Ways to Charge with SemaConnect

1. SemaConnect Pass
2. Use the SemaConnect app
3. Call 1-800-663-5633
4. Use the PlugShare app
5. Visit the mobile site:
